VITAMIN B12,SERUM

VITAMIN B12,SERUM	413	200-1100	pg/mL	TBR
LYME DISEASE,EIA W/RF WB				
LYME DISEASE SCREEN	0.42	0.00-0.90	Index Value	TBR

Index	Interpretation
<0.91	Negative
0.91-1.10	Equivocal
>1.10	Positive

The following information is provided for your reference. The EIA and WB assays in this panel are designed to detect the presence of antibodies to the Lyme disease spirochete, Borrelia burgdorferi. The qualitative EIA assay is a sensitive, but not specific, test for the presence of antibodies to B. burgdorferi. The WB assay is a more specific test for the presence of antibodies to B. burgdorferi. The results of the EIA and WB assays are reported as "Index" values. The "Index" value is a ratio of the optical density of the test sample to the optical density of the control sample. The "Index" value is reported as "Index Value". The "Index Value" is reported as "Index Value". The "Index Value" is reported as "Index Value".
